

# *CREATEit Overview*

## **Introduction**

CREATEit is designed to work with WebSonar Libraries to provide a private, unique and easy to use, web based Distant Learning Instructional Platform. CREATEit provides the user with an intuitive and versatile tool set to easily present new ideas to an audience. You can simply add captions and graphic items to your photos for sharing or, AirPlay to an AppleTV, to dynamically present your stories in a very unique and compelling way.

CREATEit Pro provides the means to view, create, store, share and acquire content. This includes video, image, audio, PDF, maps, slides, and items. Groups of Items and Slide Decks can be exported and uploaded to a WebSonar Content Library where they can be imported by any other CREATEit app client that has access to the library.

## **Layers**

The CREATEit canvas includes four separate layers. You first choose a scene for the background layer. Items and text can be added to your scene. These items can be stacked in any order. Paint can be applied either below, or on top of the items layer. Tap the Navigation Icon to get started.

## **Backgrounds**

CREATEit provides six options to select a screen for your background image. The Paper Icon opens an image picker with 40 colours and textures. Select one of the options to preview then touch the canvas to load the image.

The Photos Icon opens your Photos Library images. Selecting one of your photos closes the image picker window and loads the image cropping option. You can also use the iPad's camera to create your background.

The Slide Icon opens your Slide Deck Library. Selecting one of your slides loads the image. The Video Icon provides a Movie Frame Grabber. The Maps Icon displays a map view that can be scrolled and zoomed.

## **Cast Items**

CREATEit items are where the magic really happens. You can import hundreds of ready made items from our Community Library. Touch & Hold the Cast Icon to get started. CREATEit Pro includes the ability to make your own items and slides.

CREATEit ships with one item Group; Tools. Drag items directly to the stage or tap to load from the Cast Icon well.

# Importing New Groups

You can visit our Item Library to download additional Item Group Installers. Tap the New Icon (plus sign) in the Title Bar to get started.

Tap the Library link to view the Library resources. We recommend starting with the Tutorials group. Tap the Tutorials link and follow the three steps to add the tutorial items to your Cast Drawer.

When the download is complete Touch and Hold to exit the Library. Open your Cast Drawer and tap the New Icon (plus sign) in the Title Bar then tap on the list name to install the item group.

### CREATEit Tutorials by Wildwood Resources Items Installer

1. Tap the Image to Download the Installer.
2. Touch and Hold to Exit the Library.
3. Tap the New (plus) Icon to import your New Item Group!

# CREATEit Tutorials

Tap the New Icon to display the list  
Tap each Title to add to your drawer

Touch & Hold an  
Item or Slide to  
Open the Editor

## Text Captions

CREATEit provides a foundry for you to add any available fonts to your Type Drawer. Touch & Hold the Type Icon to open the drawer.

Tap the New Icon (plus sign) in the Title Bar to display your font library. Choose a font from the list to add to your Type Drawer.

You can display the font name in the Title Bar by swiping up on the item. You can remove a font by Double Tapping it.

# Paint

CREATEit includes a paint function. You can choose from 48 shades and four brush shapes. The painting function is cancelled by default when you finish your first stroke. You can disable this behaviour by tapping the Lock Icon in the Paint Drawer Title Bar.

Tapping the Paint Brush Icon a second time converts it to an eraser. You can paint under or over items on the stage by toggling the Layer Icon and erase all the paint by double tapping the Eraser Icon. You can also set the paint transparency with a slider.

# Create

Tap the Create Icon under Navigation to build your own items and-or save your scenarios as slides. The Item-Slide Manger displays your current Item Categories and provides a link to save a slide of your current scene.

You can add your item to an existing group (Category) or create a new one. Tap the New (plus sign) in the Item Manager Title Bar to get started.

Items require a name and image but can also support additional properties including animation, audio and external links.

# Presentations

Use the Slide Manager to create presentations that can be shown live to your crowd with AirPlay and-or published on our Community Presentation Library for direct distribution to your intended audience.

Each slide can include an audio track, an image and a link to view external resources. When viewing a presentation you can touch to pause and play the audio. Tap to open the Slide Drawer.

Touch & Hold to link to the external resources. You can choose to either hide or show the menus to your live audience.

Tap to Load a Slide  
Touch to Pause Audio  
Swipe Forward or Back  
Touch & Hold to Execute Link
